WA

Ango

Working at the intersection between design, materials development and innovative production processes, all of the light diffuser materials we work with has its own character and is either a "found" natural one, or a composite/natural material developed by experimentation. We observe and investigate what's possible with sometimes accidental or unpredicted outcomes. The whole low impact/low energy intensive process of how we create our designs also represents our view of how enlightened, environmentally responsible 21st century design and production can be. The energy, purity and truthfulness of light is our starting point, creating design pieces with love that we hope will fulfill your space with light energy.

WA

Artience Lighting

Since 2016 the principals at Artience Lighting have been fascinated with designing and creating a line of exquisite luminaires. Truly unique luminaires. This obsessive passion goes beyond enhancing a space and providing light, but improving health, the environment and well-being.

Like the Greeks who learned from the past and then improvised and improved, so too are the processes that have led us to new and refined products that stand out not only in style and design, but function and form. This is evidenced in our development of tunable white lights that support the circadian rhythms of the human body, helping people adjust throughout the day to maximize their internal clocks. We have also integrated UVC technology into our fixtures, resulting in beautiful lights that support the needs of the community today and impact our lives for a better tomorrow.

WA

Audacy

Designed, tested, and proven to cut your lighting energy costs up to 50%, with quick installation that gets you up and running 85% faster than traditional wired systems – plus Audacy System devices have up to 25 years of maintenance-free battery life. Manage employee access. Control lights with our app or onsite switches. Gather energy savings information through our Consumption Reports. Or conveniently link to your building's automation system (BAS). Together, these components ensure 24/7 custom control of your environment. The Audacy System is designed to make installation quick and changing layouts simple. You can customize your space and adjust fixtures, components and settings in minutes instead of hours, days instead of weeks – so as your company changes and grows, your lighting can too.

WA

Auroralight

From California to Macau, our reputation for durability, performance, and innovation distinguishes us as a true leader in the landscape lighting industry. You simply won't find a more robust collection of outdoor lighting fixtures and accessories. Every product featured here is crafted with pride in our Carlsbad, California factory and designed to exceed your highest expectations for quality and style. So when we say we offer the world's finest solid copper landscape lighting, even our most discriminating customers know they can count on it.

Cree

Cree is committed to providing the best solutions on the market. Offering products that are inspired by customers' needs and perfected by the knowledge and expertise Cree brings to the lighting industry. Cree recognizes the importance of beautiful, energy-efficient lighting and aspires to improve every business with uncompromising performance and payback.

WA  David Trubridge

David Trubridge is a visionary. Unlike most of us he can translate those visions into something functional. David's sculptural wooden furniture and lighting is a new world mix of old world skills and craftsmanship, sustainability of materials and purity combined with some high-tech genius. All of David's pieces are immediately evident as to their purpose, but within the seeming economy of material and fluid shapes resides their true functionality. David's Coral and Floral Lamp series combines repeat patterned CNC cut plywood with a hint of Escher to produce a geometrically pleasing form, both pure in design and practical in purpose.

WA N. ID  Delviro Energy

Delviro Energy is Canada's leading manufacturer and supplier of Commercial, Industrial, Multi-Residential, and Architectural LED Lighting. From Electronic and Mechanical Design, Circuit Board Build, Metal Fabrication, Assembly to Finished Luminaire. Delviro's LED fixtures perform in the top 10% of the industry in terms of *Efficacy, CRI, L90-L70, and Warranty.*

WA  DLS Lighting

DLS - Design Lighting Selection U.S. presents lighting tools to create drama. Our philosophy is as simple as our designs. The right light for great architecture. Specification grade LED fixtures that offer simplicity and elegant precision. Careful consideration has been given to create function, form and lasting quality. DLS offers ultra sleek fixture designs that compliment and accentuate commercial and residential architecture.

Beautiful architecture deserves great lighting effects with a timeless design.

WA  Energy Solutions

ESI lighting is your total solution for the needs of today's retrofit energy driven environment. With a tenacious focus on always providing the correct solution, we believe in creating energy efficient excellence for our friends doing business in the retrofit space of the lighting industry! We are passionate about being "American Made" and only use high quality materials and cutting-edge technology in our products. Our ability to modify our product offering to match individual project needs and special applications is truly unique in our industry. Combining our flexibility and solution-centric mindset with our in-house design and manufacturing capabilities secures our promise that "we will always do it right."

WA  Furl Lights

Furl lights change how we experience our home and commercial spaces. With one simple switch, our lights come alive and transform your environment into something special. Infuse a modern and artistic aesthetic into your spaces with intelligent, fluid-moving lights.

The rive series is a collection of modern and unique lighting wall lamps designed with three separate parts that form into one. Beautiful as they are in their closed OFF position, a simple flick of a switch changes each of the design's shape by moving two outer pieces outward into the open ON position.

WA  General Structures

General Structures has been providing the lighting industry with exceptional service since 1988 — dedicating themselves to delivering the highest levels of design, fabrication, finishing, and packaging of high-quality steel and aluminum poles.

WA  GMR Enlights

With origins dating back to 1863, GMR Enlights has a rich history in providing outdoor illumination to some of Europe's most enduring cities. Today, GMR Enlights offers a "Total Lighting Solution": from historical fixtures to those of contemporary design at a surprisingly affordable price.

WA  Hush

Hush is ideal for aiding in softening sound and reducing reverberations in commercial, hospitality and residential spaces. Hush is scientifically proven to significantly reduce reverberated noise creating an ideal and productive environment. Retrofit any space where acoustics is an issue. Hush works double duty, providing sound dampening and illumination for your space.

WA		Lightalarms	<p>Lightalarms, a North American based division of ABB provides best in class exit signage products, emergency lighting and battery products, and large scall emergency power inverters. Quality, safety, ease of installation, and long-term reliability are designed into each product from the beginning, ensuring excellence. All products undergo functional testing using our specialized quality inspection facilities. All ABB emergency lighting products are manufactured to North American quality standards.</p>
WA		Lightnet	<p>Lightnet's product range is characterized by a systematic and a convertible variety of shapes and enables high degrees of freedom for the creative lighting design. Although their product families have a different design vocabulary all are based on and overall stringent program with a consistent concept. Shapes, proportions, surfaces, optics, and color temperature are exactly coordinated so the most suitable product combination can be chosen to meet the needs of any architectural requirement.</p>
WA + OR		Lumecon	<p>Founded in 2006, Lumecon is a proud manufacturer of high quality LED lighting that's affordable, creative and built to last.
